INFRASTRUCTURE & GITHUB FEEDBACK

Group Number: 10
Date: 02/04/24
TA Assessing: Rimsha Rizvi

In general, your GitHub seems to be actively used and has submissions posted exactly where they belong, which is great. For the following weeks, please implement the following changes to your GitHub submissions as it would affect your grade in the future:
- Weekly Reports naming convention should be "CS 442 Weekly Report for Week N.pdf". Replace N with the current week's number.
- All members should actively participate in GitHub submissions/commits.

For Jira, there seems to have been some great effort made. I can see that all members have assigned tasks to themselves and included backlog as well. For the following weeks, please implement the following changes to Jira as it would affect your grade in the future:
- Try to maintain the correct structure for writing stories - "As a _, I want _, so that _". Good stories follow INVEST rules. If you want, you can add sub-tasks to each story once it is created.
- I was not sure where to assign story points to each story. But if you find an option to add that, please assign story points to each story.
- Make sure to follow the sprint deadline as presented in the schedule section on the course website (starting and ending at the correct times)
- There should be few items in the backlog at all times.
